

Bone-Hunters and Tick-Pickers:
The Great Plains in a Golden Age
of Science

Paleontology

Othniel C. Marsh

Edward D. Cope

North American Fossil Vertebrates
Identified

Pre-1847: 100 genera & species

1900: 2,200 genera & species
(250 dinosaurs)

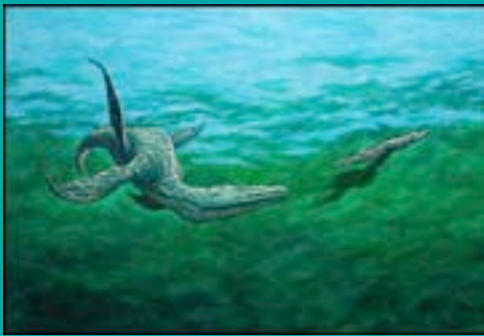

Stegasaurus

Triceratops

Pliosaur

Diplodocus carnegii

Hyracotherium

Thomas H. Huxley

Eohippus and "*Eohomo*" (the "dawn horse" and the "dawn man"), a fanciful sketch made by Huxley, famous English zoologist, on seeing the remains of the oldest horse. Needless to say the two were not contemporaries—by 50,000,000 years or so. (From Schuchert and Le Vené.)

Hesperornis regalis

The Royal Bird of the West

Charles Darwin to Marsh,
1880:

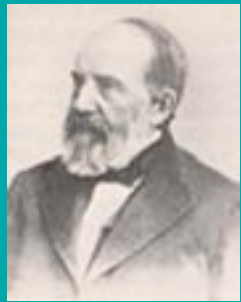

“...the best support for the theory
of evolution which has appeared
in the last twenty years.”

Charles Sternberg

Leo Lesquereaux

Arthur Lakes

William H. "Bill" Reed

Diplodocus carnegii

James Cook

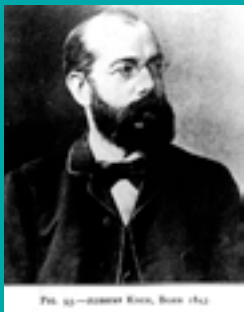

Epidemiology

Louis Pasteur

Robert Koch

Theobald Smith

Patrick Manson

Robert Ross

Malaria

Anopheles gambiae

David Bruce

Sleeping Sickness

Tsetse Fly

Carlos Finlay

Walter Reed

Yellow Fever

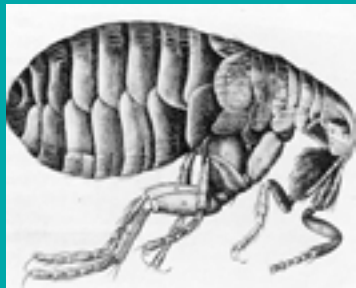

Aedes aegypti

Bubonic Plague

Ceratophyllus faciatus

Theobald Smith
